To Whom It May Concern:

I am extremely pleased to write this letter of recommendation for Robert Lewis and his firm Building Ideas for the Architectural work he has done for us in the design and construction of our dream home in beautiful Historic Plantation.

Robert and his team of engineers were extremely efficient, easy to work with and most importantly took a personal interest - not just in the house, but in us as people. In a world where taking pride in one's work and dedicated service are just about extinct, Robert was right there constantly reminding us that it still does exist. Through this project and beyond, Robert has been so responsive and has gone way above and beyond the scope of work one would even imagine an architect normally does. He always returned our calls and emails immediately and whenever a change was needed, it was done almost instantaneously.

His designs are beautiful and so well thought out. It is better than we ever imagined and fits us perfectly. During the design process, Robert actually took an entire day out of his own busy schedule to accompany my wife & I down to DCOTA. Of course, he could have simply called in some passes for us to walk around, instead, he drove all the way down from Port St. Lucie because he wanted to get a hands on feel for our personal tastes and preferences. Who even does that?

When it came time to submit our permit set to the City of Plantation, the plans sailed through with very minimal comments and was approved very shortly thereafter. Bill Gale, the chief plans reviewer actually came out of his office to ask me for some of Robert's business cards, explaining that he has dealt with hundreds of architects on thousands of projects over the years and hadn't ever come across such a complete and thorough permit set. He said he was going to use the plans as an example, to show other architects how it is supposed to be done.

All said and done, I hold Robert in the highest regard and couldn't ever say enough good things about him - both personally and professionally. I couldn't imagine how this crazy dream house project of ours would have gone had we not been fortunate to cross paths with Robert Lewis. Every time, when my wife and I drive up to our beautiful home, we simply love him more.

Yours Truly;

Rob Tischler
